

TECHNICAL DATA SHEET

WATER SPOT REMOVER

Features:

The Water Spot Remover has a strong acidic mixture that softens the hard minerals left behind on the surface as the water evaporates. It is specifically designed to emulsify the minerals making it easier to wipe off the hard stains.

Directions:

1. Shake well before use.
2. First apply into a small area for testing. Note: For using on windows, please do dilute this product at rate of 1:5-1:10, and spray on the glasses, rub and spray lots of water, wipe with wet towel and dry with dry towel. All steps should be executed within 30 seconds.
3. Always apply into cool surfaces.
4. Rub it with a towel and rinse off or wipe treated area with a wet/damp cloth immediately.
5. For extremely contaminated surfaces, repeat process using a scrub sponge.

Precautions:

- Keep out of reach of children.
- It is not advisable to spray directly on some surfaces such as Glass, Electric Appliances, Leather, Plastic, etc.
- Avoid excessive spraying to one place.
- If contacted with eyes, flush with clean water and seek medical assistance.
- The use of this product Effectively and Safely is the sole responsibility of the user.

Maybe fatal if consumed!
